Freedom of Information request reference number: 8292.1

Date of response: 05 February 2024

Request:

Are there any changes in the number of fires caused by lithium-ion batteries and to ask if you have any data I could use on this? I am specifically looking into the ratio of injuries: fatalities from fires caused by lithium ion batteries, but would be glad and grateful to receive any information on the topic.

Response:

In response, as we routinely get asked for information about the number of e-bike, e-scooter, electric vehicle and other lithium battery fires attended by the Brigade, we have published this data on the [London Datastore](#) to assist those who require it.

The data is provided for three calendar years (36 months) and is updated monthly.

The information is accessible via the following link:

<https://www.london-fire.gov.uk/safety/lithium-batteries/charging-electric-bike-and-electric-scooter-lithium-batteries/>

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request [on our website](#).
